ARYAN SINGH PARMAR

+91 90748-06913 | aryansinghparmar05@gmail.com | Linkedin | Github

CAREER OBJECTIVE

Aspiring Software Engineer with a strong foundation in full-stack web development and core computer science fundamentals. Proficient in building scalable backends using Node.js and Express.js, with hands-on experience in HTML5/CSS3 frontends. Adept in C++, Python, and SQL database management, seeking an opportunity to contribute technical skills to impactful software solutions.

EDUCATION

Technocrats Institute of Technology (Excellence) | RGPV Bhopal (MP)
Bachelor of Technology in Artificial Intelligence and Machine Learning | September 2024 - Present | CGPA: 7.56

Indira Gandhi Govt. Polytechnic College | RGPV Chhindwara (MP)
Diploma in Computer Science | October 2021 - July 2024 | CGPA: 6.9

Kendriya Vidyalaya, Chhindwara (MP)
10th Secondary | April 2020 - April 2021 | Percentage: 75.5%

SKILLS

- **Programming Languages:** Python, C++(Basics)
- **Core CS Fundamentals:** Data Structures & Algorithms (C++), OOPs, DBMS
- **Web Development:** HTML5, CSS3
- **Backend & Frameworks:** Node.js, Express.js
- **Databases:** SQL
- **Tools:** Git, GitHub, VS Code
- **Soft Skills:** Collaborative Teamwork & Leadership, Proactive Learner, Agile

PROJECTS

AI Virtual Painter

- Developed a real-time virtual drawing application utilizing computer vision and hand gesture recognition.
- Implemented MediaPipe to track 21 hand landmarks, enabling precise, gesture-based drawing and interface controls.
- Used OpenCV and bitwise operations to seamlessly overlay the digital canvas onto the live camera feed.
- Leveraged NumPy vectorization for high-speed matrix handling, achieving low-latency performance on standard CPU hardware.
- Enhanced Human-Computer Interaction (HCI) by designing an intuitive, lag-free canvas control system.

AI Censor Bot

- Developed a real-time browser extension to detect, filter, and censor inappropriate dynamic webpage content.
- Implemented live DOM monitoring using MutationObserver and applied regex pattern matching for low-latency text and audio filtering.
- Built a user-friendly popup interface featuring toggle controls and custom wordlist management.
- Integrated the Chrome Storage API to persist user settings and content preferences locally.
- Ensured full client-side execution for user privacy and minimal resource overhead.

ACHIEVEMENTS

- **Technical Training:** Attended an intensive, hands-on 15-day training session on Linux Fundamentals, focusing on shell scripting, file system management, and command-line automation.
- **Capgemini Exceller AgentifAI Buildathon (2026) – Grand Finale Qualifier:** advanced through multiple rounds including coding challenges, quizzes, and solution development using Generative AI and Agentic AI concepts.

CERTIFICATIONS

- SAP Certified - Back-End Developer - ABAP Cloud
- IBM Certified - Artificial Intelligence Fundamentals
